PROFESSIONAL SUMMARY

Information Science and Engineering student with hands-on experience in full-stack web development, machine learning, and data structures and algorithms. Experienced in building production-oriented web applications using React, Next.js, FastAPI, PostgreSQL, and cloud deployment platforms. Strong interest in scalable software systems, AI-powered products, and practical problem solving.

TECHNICAL SKILLS

Languages	Python, C++, JavaScript, HTML, CSS
Frontend	React, Next.js, Tailwind CSS, Bootstrap
Backend	Node.js, Express.js, FastAPI, REST APIs
Databases	PostgreSQL, MongoDB
Machine Learning	Python, scikit-learn, pandas, Sentence Transformers, FAISS
Tools & Cloud	Git, GitHub, Vercel, Railway, Supabase, Docker, Playwright
Core Concepts	Data Structures & Algorithms, OOP, DBMS, API Design, Authentication

PROJECTS

Hiron — Applicant Tracking System

Full-stack multi-tenant recruitment platform for jobs, candidates, resumes, hiring pipelines, scoring, notes, and recruiter workflows. Built with Next.js, FastAPI, PostgreSQL, Supabase, Vercel, and Railway. Implemented resume upload and asynchronous parsing workflows.

AlterSelf — AI Personalization System

Machine learning project using Sentence Transformers and FAISS for local semantic embeddings and similarity search. Built a FastAPI backend and Vite frontend with Apple Silicon MPS support.

LapSense — F1 Race Strategy Intelligence

ML-focused project using FastF1 data, feature engineering, lap-time prediction, tire degradation modeling, race simulation, and an interactive Streamlit dashboard.

EDUCATION

B.Tech / BE — Information Science & Engineering

JSS Academy of Technical Education, Bengaluru (VTU)
Expected Graduation: 2027

ACHIEVEMENTS & EXPERIENCE

- Solved 100+ problems on LeetCode and actively practices competitive programming.
- Participated in open-source programs including Social Winter of Code and Social Summer of Code.
- Built and deployed multiple full-stack and machine-learning projects using modern cloud platforms.
- Completed structured web-development project challenges and maintained active GitHub development work.

ADDITIONAL INFORMATION

Primary programming language for placement preparation: Python. Also proficient in C++. Interests include full-stack engineering, machine learning, UI/UX, and scalable application development.
